EXPERIENCE

Aptech Computer Education.

Advanced Diploma in Software Engineering(ADSE)
(Extends to Middlesex University)
September, 2023

- Created a console banking application using C programming that featured the real life basic ATM processes such as pin verification, withdrawal, deposit, balance check and others of the same sort.
- Alongside that project comes an ecommerce website using HTML, CSS and JS which incorporates the use of the local storage feature while storing the products there.
- Also built an ecommerce website using react, typescript and css which entails adding to the cart, removing from the cart, searching through the products to find a particular product etc.
